

# European tyre labelling overview

New European tyre labelling regulations have applied to both passenger and light and heavy commercial vehicles since 1 May 2021. This label provides information on various performance criteria of the relevant tyre. The European tyre label is intended to provide users with clear and unambiguous information about the fuel efficiency, safety and noise performance of new tyres. The label indicates the wet grip, rolling resistance and external noise. In addition, a new snowflake pictogram highlights tyres suitable for use in snow or in extreme, icy conditions. An overview of all types of tyres offered by Knapen Trailers is shown below. Click on the type of tyre you need, and you will be redirected to the relevant tyre label in the European database:

	Type
Continental	<a href="#"><u>Continental Scandinavia HT3 245/70 R17,5 3PMSF</u></a>
Continental	<a href="#"><u>Continental Scandinavia HT3 265/70 R19,5 3PMSF</u></a>
